Mardi Himal Trek

Trip Overview

Soft and easy yet, the most incredible views of Himalayas and other landscapes form relatively lower elevation- the Mardi Himal Trek.

Mardi Himal is one of the short and eco-trail treks in Nepal near by Pokhara in the base of Annapurna Mountain. The Mardi Himal base camp trek is an easy and soft trek that runs on the mid-hills of western Nepal keeping the enchanting view of Annapurna to its north. Before Prince Charles with his entourage of ninety people treaded the trails of this trek, it was called Annapurna Skyline Trek.

Mardi trek begins northeast of beautiful lake town, Pokhara. Three day long of soft trek, which goes as high as 1700m is an incredible walking adventure. The trek caters the best of rural culture and the lifestyles of different tribes living in the region. The most fascinating aspect of the trek is that we get to walk on the ridgeline of lush vegetation from where the widespread range of sparkling Himalayas and the rhododendron flower on our right feasts our eyes. The views of the Himalayas include sacred Annapurna, unique Mt. Fishtail and beautiful Dhaulagiri among others. On the left, the view of green lakes (Begnas & Rupa) ringed by lofty hills amazes us.

An amazing trek that has no issues of altitude sickness can be the best trekking holiday in Nepal for those lacking time and good shape of health. Himalayan Glory Travel urges to try this soft trek with the scenic beauty of Nature. It is because, the trek has so many things to offer like incredible sunrise view from Pothana, Badal Danda and Mardi Himal Base Campmm, the view of layers of green hills until the horizon, mountains for sure and most importantly the rural culture of tribes like Gurungs and Brahmins.
